

## Stramek® mechanical seals to suit refrigeration O.E.M. applications

Stramek have extensive sealing experience within the refrigeration industry, and have developed a wide range of seals, with the specific elastomers and advanced face materials required to suit the refrigerants and synthetic lubricating oils the mechanical seals are routinely exposed to.

As there are a wide range of compressor models, and generally each compressor has model specific seal arrangements, Stramek have developed many seal designs to suit compressor applications. The following list merely illustrates our main guaranteed stock lines. Please enquire with any other requirement.

Furthermore, these seals can be installed in the equipment without any amendment to the existing housings or shafts. The Stramek designs, excellent materials, wide stock range and the ability to manufacture to any industry design or requirement, complement the Stramek Refrigeration Seal range.
