

Description

Stramek STK F225 is square-braided from long, heavy duty natural fibre yarns. These high-strength yarns are thoroughly impregnated, before and after braiding, with a specially blended lubricant.

The packing is designed to give a very low coefficient of friction, resistance to wear and rotting, good compressibility, high flexibility, high tensile strength and ease of installation.

Stramek F225 is an excellent, general purpose packing especially for water duties. Its resilience, low shaft wear, ease of fitting and economic cost makes Stramek F225 an effective choice for many standard applications.

Applications

STK F225 is suitable for all general water-based applications in pumps and valves, up to 120 Deg C.

Operating Limits

	Valve	Piston	Pump
Temperature		-20°C - +120°C	
Pressure Rating		50 Bar	
Rotary Speed		8 M/S	
pH Range		5 - 9
