

## Description

Stramek G8L is inter-braided from continuous filament, textured, air-blown glass yarns. The glass fibres are heavily lubricated and thoroughly impregnated with PTFE dispersion and an inert lubrication, both prior to and subsequent to braiding.

Stramek G8L can replace packings in general, non-arduous duties, whilst being of superior square inter-braid construction.

Consider that STK G8L's air-blown glass fibres are kinder to the shaft and you have a naturally square packing that will seal with less gland pressure, significantly reduce shaft wear and gland adjustment and thus increase packing life in light duties.

## Applications

STK G8L is a smooth, cool running packing for a wide variety of uses in a plant. Particularly useful on water and mildly abrasive slurries, solvents and chemicals in reciprocating and centrifugal pumps, mixers and valves.

## Operating Limits

	Valve	Piston	Pump
Temperature		-40°C - +280°C	
Pressure Rating		150 Bar	
Rotary Speed		12 M/S	
pH Range		2 - 12
